

# Pliant Orchestration Platform Overview

API-driven, low-code platform for automating, integrating, and connecting your technology stack

Enterprises have used automation in their IT operations for decades. That's why traditional automation platforms, vendor-specific bundles, point solutions, and manual approaches are so prevalent today.

It's also why so many organizations looking to take automation to the next level are hitting roadblocks. Siloed tactics aren't enough, and building complex automation across organizational and technology boundaries isn't feasible with the standard tools and approaches.

What's needed is a fundamental shift to cross-vendor, cross-domain orchestration and automation. This requires fast, easy, and flexible ways to generate new workflows and processes that also work with existing automation investments.

It's how an enterprise can connect and integrate not just its tech stacks, but its entire business. And it's precisely what The Pliant Orchestration Platform delivers.

## The Solution

The Pliant Orchestration Platform gives operations and engineering teams simplified and streamlined ways to use automation and orchestration more intelligently and effectively throughout their environments. With its powerful yet intuitive capabilities, the Pliant Orchestration Platform unlocks new ways for teams to automate, integrate, and connect their digital enterprises.

Pliant has abstracted thousands of APIs from popular vendor products. The resulting low-code 'action blocks' make it easy, fast and flexible for users to produce whatever automated processes and workflows they need. Users of all skill levels can create and deploy automation across platforms, services, and applications in hours, not days or weeks.

Pliant customers typically experience faster resolution of business challenges and accelerated time-to-market for new services. They also benefit from lower administrative overhead through centralized management.

Get a jumpstart on building efficiencies into your organization so you can focus on delivering a world-class customer experience. Contact our team to discuss your needs and how we can help: [pliant.io](https://pliant.io) | [hello@pliant.io](mailto:hello@pliant.io)

### Automate

Tasks and workflows to enable true digital transformation

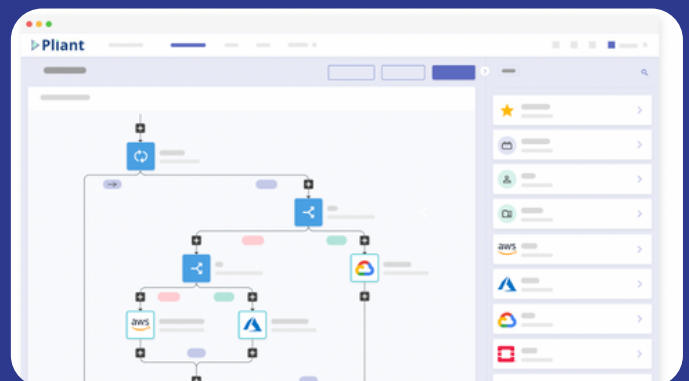

### Integrate

Infrastructure and applications to deliver a seamless experience

### Connect

Data and processes to accelerate innovation and drive value

# Pliant Orchestration Platform – Benefits

## Lower Costs & Preserve Investments

Automate time-consuming and cost-intensive business workflows. Incorporate and secure existing work into Pliant's universal API-driven platform.

## Increase Operational Agility

Faster, easier, and more flexible development and deployment of powerful, code-optional orchestrated workflows and processes.

## Improve Experiences & Productivity

Accomplish more in less time by eliminating manual tasks and replacing them with predictable, reliable, and manageable automated processes.

## Accelerate Time-to-Value

Automate traditionally manual tasks and integrate new and existing systems to drive more value measurably faster.

## Reduce Tool Sprawl & Eliminate Silos

Eliminate barriers between teams with a single, unified cross-technology and cross-domain orchestration platform.

## Standardize Operations & Reduce Errors

Automate repeatable tasks with predictable, standardized processes and error-free results.

## Popular Use Cases

- |   |   |  |
|---|---|--|
|  User Onboarding      |  Bare Metal Provisioning |  Container Provisioning       |
|  Compute Provisioning |  ITSM Orchestration      |  Audit & Remediation          |
|  VM Provisioning      |  Embedded iPaaS          |  Hybrid Network Configuration |

**Modernize** your IT environment quickly, easily and with maximum flexibility. **Simplify and streamline** the orchestration and automation of any task across technology and organizational boundaries. **Build and deploy** custom, automated workflows and processes faster, easier, and with more flexibility than you ever imagined.

**Learn More** about automating, integrating, and connecting your digital enterprise with the Pliant Orchestration Platform. Our experts are ready to help. Contact our team today: [pliant.io](https://pliant.io) | [hello@pliant.io](mailto:hello@pliant.io)
